GENERAL INFORMATION

SALE TIME:

1:00 p.m., M.S.T., Tuesday, December 5, 2023.

LOCATION:

1 1/2 miles south of Etzikom on Highway 885 ~ Signpost 61033

DELIVERY:

Free delivery within a 350 mile radius of the sale; further, for the cost of our fuel on all cattle.

HEALTH:

The health of the cattle is excellent. Calves receive 7 Somnus with Spur plus Pyramid FP4 & Preresponse at branding and in October. Cows and yearlings received Pyramid FP5 in May. All cattle had Pouron Ivomec in October. Females were preg. checked and given estimated calving dates by Dr Krista Dayman, in September.

SPECIAL SALE CONDITION:

All bull buyers have the option to let us winter the bull for \$150 per month, until they wish delivery.

BULL GUARANTEE:

Each bull will be guaranteed unconditionally for 3 full breeding seasons. We will replace unsatisfactory bulls or you can receive credit for the difference between the purchase price of the bull, *less credit used*, and \$1,100 or your salvage value, whichever is more, and less your usage. The credit you receive will be divided equally between the bulls you purchase.

Example: You have \$800 credit. You buy bulls for \$4,600 and \$3,600 (you pay \$4,200 and \$3,200). You use the \$3,600 bull one year and then he dies. We will give you \$1,400 credit at a future sale. $\$3,600 - \$400 = \$3,200 - \$1,100 = \$2,100$, or \$700 per year.

TERMS:

The terms of the sale are cash, cheque, or etransfer. Please include wintering charges in the amount. Credit arrangements may be made prior to the sale.

SIGHT UNSEEN PURCHASE PLAN:

If you are unable to attend the sale, give us a call with your requirements. Satisfaction guaranteed. If you don't like the bull when we deliver him, we'll keep him. This year, we are pleased to offer online bidding through DLMS. Another option is for us to phone you minutes before your pick is being sold ~ You can hear the auction over the phone and bid without anyone knowing your limit.

RESPONSIBILITY:

Everyone attending the sale does so at their own responsibility, and without liability on the part of the owners or their employees.

LUNCH:

Coffee and donuts available all day, and lunch will be served from 11:00 a.m. until sale time.

Balanced Trait Selection and Using EPDs:

We have always tried to use EPDs and balanced trait selection when culling our cows or when sourcing new genetics, but have made a few mistakes along the way. An animal can be right at the top of the breed in almost all traits, but if it fails in just one area, it is still a cull. Our dad gave us an excellent functional Hereford herd, and when we ventured into the Angus breed, Stevenson Angus gave us our pick of all cows nine years and older. Great fertility, feet, udders and docility - again, very functional. We were drawn to the Angus breed when looking at mouth-watering pictures of daughters of a certain bull. We A.I.ed to him and the next year, our two top-selling bulls were his sons. The following spring, when their scrotal measurements were 31 cm and 30 cm, both went into our freezer. When scrotal EPDs first came out that bull had a negative EPD for S.C. We have really watched that trait closely since then, and have had minimal problems.

Another problem very concerning to us was having to cull daughters with poorer feet than their mothers'. Our heaviest used A.I. sire in 2020 was Sitz Stellar 726D, and in 2021, Ellingson Three Rivers 8062. Both bulls are trait leaders for both claw-set and foot-angle.

Having a Hereford background, docility is another trait very important to us. When we tag, paste, and weigh our Hereford calves, it is always a one-person job, and we can just ignore the cow - every one of them. We have used the docility EPD for Angus since it came out, as well as scoring the docility of every cow within hours of giving birth. It is very rewarding in noticing improvements in all areas in our cow herd.

WELCOME TO OUR 39th ANNUAL PRODUCTION SALE

It is with pleasure that we welcome you to our 39th annual production sale and the 17th video sale to be held on our ranch. We feel this sale offers you a chance to incorporate into your herd some of the very best maternal genetics you can find anywhere. We have bred our entire herd A.I. to the very best bulls in North America for 50 consecutive years. Breeding A.I. means never being outbid on a bull we want or settling for second choice. The chart below compares the average Hereford and Angus bull born in 2022 with our average sale bull:

HOW TO READ AND USE THE DATA

EPDs are the expected differences in performance and carcass quality of an animal's sons or daughters. Comparing EPD values allows us to obtain a difference between two animals.

Consider Bull A with a +60 EPD for weaning weight and Bull B with a +40 for weaning weight. On average, you can expect calves from Bull A to wean 20 pounds heavier than those from Bull B. If they each sired 25 calves, you could expect to market 500 more pounds of calf by choosing Bull A.

You might sell all your calves at market in the fall. Since you do not retain ownership in the calves, you might think that looking at yearling growth and carcass quality has no importance. I beg to differ.

The feedlot buyer knows exactly how well your cattle fed and graded, and will bid accordingly in the future.

PRODUCTION EPDs

CE (Calving Ease) is expressed as a difference in percentage of unassisted births in first calf heifers. If you use a +7 CE bull instead of a +2 CE bull, you can expect to help 5% fewer heifers at calving time.

BW (Birth Weight), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW (Weaning Weight). This is the number you look at for weaning weight. The bigger the better.

YW (Yearling Weight), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires. High yearling weight does have a positive correlation to larger mature size.

SC (Scrotal Circumference), expressed in centimeters, is a predictor of scrotal size. Large scrotal size has a positive correlation to early fertility in heifers.

MATERNAL EPDs

MILK. The milk EPD is something to look at if you are retaining heifers. The higher the number, the more they are expected to milk.

CARCASS EPDs

CW Carcass Weight (Angus). Expressed in pounds, this is a predictor of the difference in hot carcass weight of a sire's progeny compared to progeny of other sires. The bigger, the better.

REA. The ribeye area EPD: the bigger the better.

Marb. The marbling EPD: the bigger the better.

Underneath the EPDs is the Breed Percentage. This is the percentile of where each bull fits in the entire breed.

PIGMENT (Herefords)

This is the percentage of pigmentation around each bull's left eye (LE), right eye (RE), and scrotum.

AGE OF DAM

The age of the bull's mother when the most recent foot and udder scoring was done. We score the feet on a dry, frozen winter day (and always the worst foot). We score the udder the day the calf was born and before he has sucked (again on the worst quarter). We have included the cow's age as the scores often become worse as the cow gets older.

HOW TO READ AND USE THE DATA

FOOT SCORE

We score the foot angle and the claw set on the mother of each sale bull.

UDDER SCORE

We score the udder suspension and teat size on the mother of each sale bull.

DOC (Docility)

We score the docility on all of our cows on a 1 - 9 scale within hours of giving birth. 1 - 2, you can ignore the cow; 3 - 4, be careful; 5 - 6, you need a stick; 7 - 8, weighing is a two-person job; 9, the cow hunts you. When we tag and weigh our Hereford newborns, we sit on the calf and ignore the cow. Since the Angus breed came out with docility EPDs, we have made it a real priority to select sires with better dispositions.

ACT. B.W.

The actual scale birth weight of each bull.

We have scale-weighed every newborn calf (both registered and commercial) for the past 39 years. Our neighbours probably thought we were crazy driving our tractor all over the pasture with the bucket up! We have used a tape, but only to compare. Every weight we write down is a scale-weight. We have found the tape to be 6 to 12 lbs light, and birth weight is too important to our customers (and our industry) not to be completely accurate.

Our new scale is a real back-saver

*We occasionally weighed in the barn.
98% of the time like this.*

W. I. (WEANING INDEX)

The weaning index of the bull. Average daily gain from birth to weaning with slight adjustments for age of dam (so we can fairly compare calves from heifers to those from mature cows). The average of our herd is always 100.

Y. I. (YEARLING INDEX)

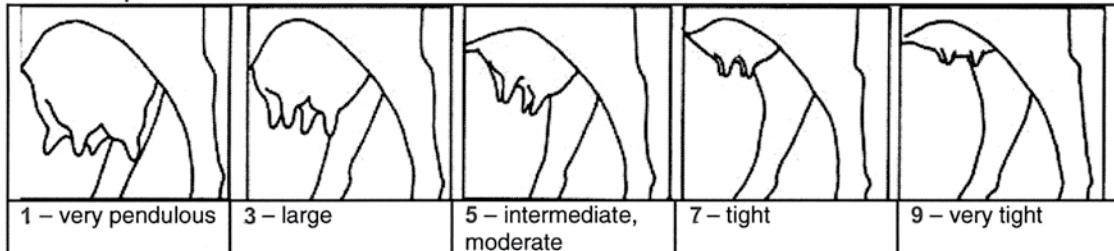

The yearling index of the bull. The average of our herd is always 100.

OCT. 9 Wt. and S.C.

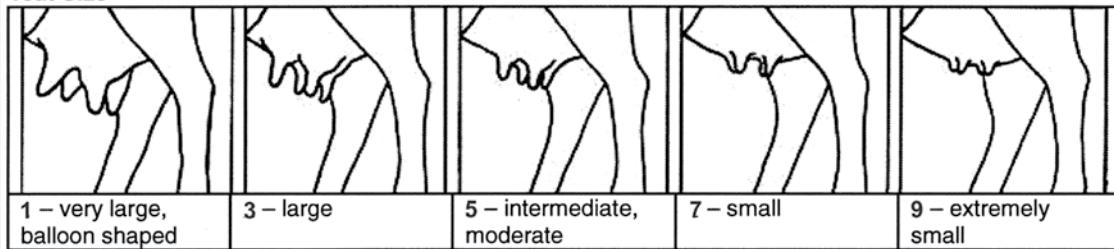

The most recent weight and scrotal circumference measurement. Both numbers increase dramatically by sale day. We will have updates on our website a few days before the sale.

Three year old black Angus cows bred for early April baldie calves.

ANGUS COMMERCIAL BRED HEIFERS

The Lots E, F and G are straight black, and sell bred A.I. to the low B.W. polled Hereford bull Bar JZ Buccaneer 210E. After A.I., they were exposed to low B.W. Hereford bulls until July 25th. We offer free delivery within 350 miles of the sale, further for the cost of our fuel. As with the cows, you can pick and choose from each lot, but each lot will have a maximum of two buyers. We will post updated weights on our website two days before the sale.

	206K	April 21/22	43H	13Y	1030	---	---	April 8

Younger heifers and a bit green, but they will be much heavier on sale day. They were moved to a fresh pasture on Oct. 5th, and are looking good.

BWF AND HEREFORD COMMERCIAL BRED HEIFERS

Lot H are black baldie heifers and Lots I and J are Hereford heifers. They sell bred A.I. to RR Endeavor 9005, a black Angus bull with a -3.1 BW EPD (in the top 1% of the breed). After A.I., they were exposed to low BW Angus bulls until July 25th. Same sale conditions as our Angus heifers.

A solid marked, fully pigmented, good haired son of the 4013 bull, 61K is #2 in the sale for marbling. The Zoetemans gave us the pick of their bred heifers for \$10,000, and we chose 13G. She is a full sister to 32E, who topped Brost's 2017 sale at \$27,000, and also 5K, the 2022 Grand Champion at the Red Deer Hereford Genes event. Milk River Cattle Co. have a brother.
